PREAMBLE:

Much has been documented on PSA since its outbreak.

However not all has been explained or discovered, presently there is no cure for the elimination of this bacterial disease. Bombarding the plant with chemicals, to no avail, has been the only approach to date.

The **Ergofito** treatment will **not** eliminate PSA but will allow the plant to live and thrive in a symbiotic relationship.

ERGOFITO APPLICATIONS:

The following ten applications need to be diluted with enough water and applied to sufficiently saturate each plant.

FIRST STEP, SOIL REGENERATION:

One month prior the end of winter, apply the following:

125 kg of **Ergostartbio** per hectare.

SECOND STEP:

When winter is over and prior budding, apply 3Kg of **Ergofito Cu/Zn** mixed with 3 Kg of **Ergofito Nutrigem** per hectare.

This is a foliar application, wet the canopy as well as the trunk well and ensure that the whole plant is wet.

THIRD STEP:

When the new shoots are 6 to 8 cm long, apply foliar, 5 Kg of **Ergofito Defense** as well as 2 Kg of **Ergofito Nutrigem** per hectare, ensure that each plant's canopy is well wetted.

Over the above also apply radically 3 Kg of **Ergofito Defense** as well as 6 Kg of **Ergofito Mag**, via the drip irrigation.

FOURTH STEP:

Prior flowering, apply 3 Kg of **Ergofito Boron** as well as 3 Kg of **Ergofito Defense**, foliar, ensure that each plant's canopy is well wetted.

Over the above also apply radically 3 Kg of **Ergofito Defense** as well as 6 Kg of **Ergofito Mag**, via the drip irrigation.

FIFTH STEP:

When the fruit is 1 to 2 cm long, apply foliar, 3 Kg of **Ergofito Defense** as well as 1 Kg of **Ergofito Stim**, ensure that each plant's canopy is well wetted.

Over the above also apply radically 3 Kg of **Ergofito Defense** as well as 6 Kg of **Ergofito Mag**, via the drip irrigation.

STEPS SIX TO TEN:

Apply every ten days from Step five, for five consecutive times ten day apart the following:

Foliar: 3 kg of **Ergofito Defense** with 1 Kg of **Ergofito Stim** and 1 Kg of **Ergofito Algae**, ensure that each plant's canopy is well wetted.

Radical: Over the above also apply radically 3 Kg of **Ergofito Defense** as well as 6 Kg of **Ergofito Mag**, via the drip irrigation.
